PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with strong fundamentals in DSA, OOP, and OS (Java, C/C++, Python) and full-stack (MERN) experience building scalable, distributed systems. Software Developer Intern at Upteky Solutions; independently shipped two full-stack apps, including a 3-service ML-driven platform; practical AWS experience (S3, EC2, DynamoDB, Aurora); 100+ problems solved on LeetCode.

EDUCATION

Pandit Deendayal Energy University

B.Tech, Computer Science Engineering | CGPA: 8.22/10

July 2023 – July 2027

Gujarat, India

Maharaja Agrasen Vidyalaya

Class X (CBSE) | 86.2% | Class XII (CBSE) | 84%

Ahmedabad, Gujarat, India

2020 – 2022

EXPERIENCE

Software Developer Intern — Upteky Solutions Pvt. Ltd.

May 2026 – July 2026

- Hardened a production chatbot/voicebot against prompt injection and jailbreaks by redesigning system prompts with layered instruction hierarchy and refusal policies; optimized the AI pipeline via de-duplication and response streaming, cutting per-interaction cost and perceived latency.
- Audited and remediated multiple client websites on WordPress/CMS platforms, reducing page load times by 17–20% via CMS caching, JS/CSS minification, and asset-loading restructuring; verified Lighthouse performance and SEO gains through repeat audits.
- Designed and shipped an end-to-end social-media automation pipeline in n8n (RSS + knowledge base → OpenAI text/image → email approval gate → Twitter/LinkedIn publishing).
- Led white-box QA on two enterprise apps (Arya ERP, JM PlastoPack CRM on Firebase Firestore) across 16 functional areas and 7 role-based accounts; reported 24 severity-classified defects (3 release-blocking) and root-caused a missing Firestore composite index behind two critical failures.

PROJECTS

CareerCompass AI | React.js, Node.js, Express, MongoDB, Flask, Python, spaCy, scikit-learn, JWT | [GitHub](#) | [Demo Link](#)

- Architected a scalable, distributed 3-service MERN-based platform (React/Vercel, Express/Render, Flask/Hugging Face) with JWT auth, Google OAuth 2.0 Sign-In with custom client credential configuration, and MongoDB Atlas persistence.
- Designed a 2-pass NLP matching algorithm (spaCy + TF-IDF) with alias normalization and lemmatization across 200+ skills, achieving 92% keyword recall across 12 job roles.
- Trained an ML-based ATS scoring model (GradientBoostingRegressor, 600 samples, 10 features) achieving an R^2 of 0.87 on a held-out test set, surfacing top score drivers as actionable frontend insights.
- Integrated GPT-4o-mini via a Node.js proxy with conversation history and ML-derived tips in the system prompt, powering a context-aware career chatbot with sub-2s response time.

DripStore | React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, Cloudinary | [GitHub](#)

- Built a full-stack MERN e-commerce platform with JWT auth, role-based access control, and a 7-model REST API covering products, orders, cart, and users.
- Integrated Razorpay payment gateway with server-side signature verification to reduce failed-transaction risk via cryptographic order validation.
- Configured a Cloudinary image upload pipeline for product management and built an admin dashboard with full CRUD and real-time order tracking across 5 stages.

TECHNICAL SKILLS

- **Languages:** Java, C/C++, Python, JavaScript, SQL, HTML/CSS
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Flask, Tailwind CSS, Scikit-learn, Streamlit
- **Databases:** MongoDB, MySQL
- **Cloud:** AWS (S3, EC2, DynamoDB, Aurora)
- **Tools:** Git, GitHub, Postman, VS Code, n8n, Google Lighthouse, Firebase Firestore
- **Core CS:** Object-Oriented Design, Data Structures & Algorithms (Java), Operating Systems, Computer Networks, DBMS

EXTRACURRICULAR

- Editor-in-Chief, Video Graphic Association (VGA), PDEU — led the editing team, managed end-to-end video production.
- Edited a short film nominated in the IFP 50 Hour Filmmaking Challenge 2024 (Premiere Pro, DaVinci Resolve).
